*Image printed on instruction may have a certain level of color difference than actual object. *Actual object may have certain level of difference compare with the image printed here, either in shape, size or pattern. *For materials in this kit, their colors, shapes, sizes and pattern may vary, due to manufacturing process. *For the metal parts, it is possible to have certain amount of flaws on the surface, due to plate coating process. *Within the manufacture process of the chain, the dimensions of chain link may have a certain amount of variations. *The bead color may fade, due to manufacturing process.

Read the following before you start

- * Please check if the contents are all included.
- * Closely refer to <Attention> before starting your work.
- * You will need:
tweezers - for detailed work.
toothpicks - to remove air bubbles, place decorative parts, and apply the resin to parts.
an apron - to protective your clothes.
*Color or fiber of the flocky powder may stick on your clothes, be careful of that.

Using a resin

*Read instruction of prepared resin before start. (Prepare the tool as necessary)
*The time required depends on the season and the size of the craft.

<Attention>

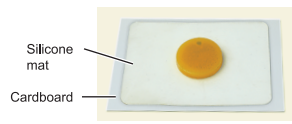

Pay attention when dealing with metal parts

- As the color of plate coating may be affected if they were touched with sweat or stored in dirt, please wipe away the sweats or dirt with a soft cloth before you store them. We also recommend you to store the metal parts in a bag with zipper.
- Please never wipe the metal parts with jewelry polishing cloth containing abrasive material, that will affect the color of the plate coating.

 Keep out of reach of children and pets. Maybe harmful if swallowed.

Preparation

Place a cardboard and a silicone mat under your work, so as to keep your work desk clean. Hence, you can move your work into the lamp right away and make it more convenient.

Please read **Instruction**, **Tip** and **sample image**, before you start.

Tip

Tip1

Remove air bubbles with a toothpick before hardening resin.

Tip2

Prepare a plastic sheet, maybe a free OPP bag, put on some resin and start your work.

Instruction The following pictures are just examples. Color, size, shape and pattern of materials in this kit may be different from pictures.

A How to use powder *A small amount of powder can color resin well.

1

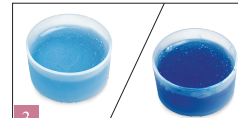

Apply some clear resin to a silicone cup. Add a small amount of powder with a toothpick, and mix powder and clear resin on the side. * Grind powder and mix them.

2

When the powder are mixed to a certain extent, mix the color and resin completely. Be careful not to cause air bubbles.

3

Repeat step **1** and **2** to suit your preference color. * Be careful not to put too much powder into the resin. Resin may not harden. Also, the surface may not be flat after hardening.

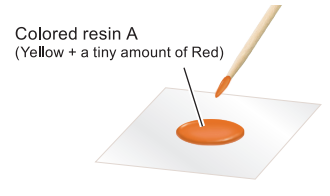

How to make

  **Work away from direct sunlight and UV ray. When you don't use lamp, please turn it off.**

1 Apply some clear resin to an OPP bag, and create the colored resin.

Tip 1,2

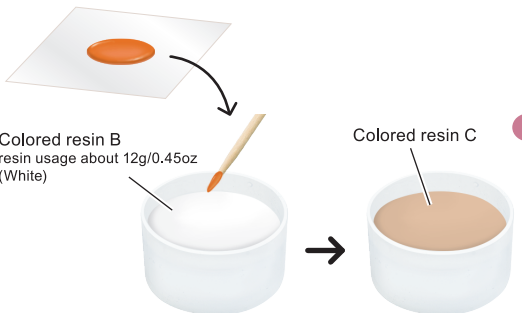

Instruction A

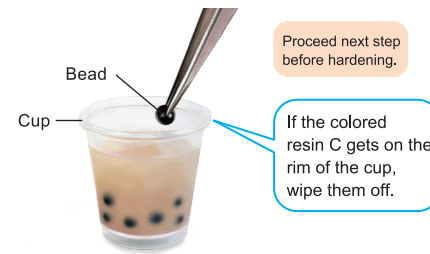

2 Create the colored resin B. Add a small amount of colored resin A to the colored resin B. * Colored resin A will be used in step **5**.

Tip 1

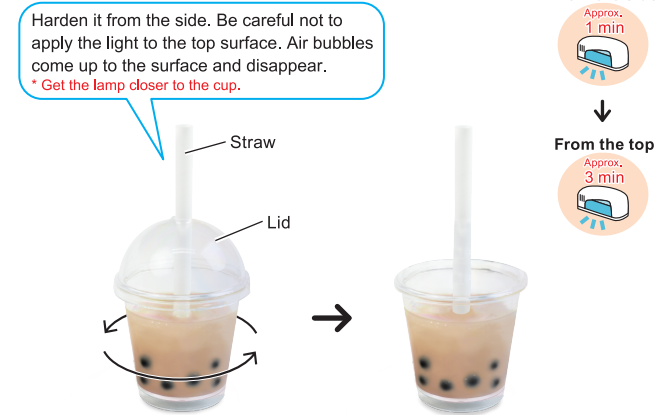

Instruction A

3 Apply the colored resin C to the cup until it is 8/10. Put beads into the cup along the side of it. * Leave four(4) beads. Those will be used in step **7**.

4 Close the lid, and put a straw through the lid. Harden resin from the side of the cup. Rotate the cup during hardening. Remove the lid, and harden it from the top. * Check if the straw is put through straight before hardening. * Do not look at the light directly.

5 Create the colored resin D. Add a small amount of colored resin A to the colored resin D. Fill it to the rim. Harden it from the side as same process as step **4**.

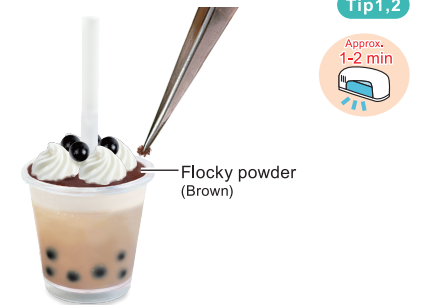

6 Apply a thin layer of clear resin to the top. Put whipped cream parts onto it, and harden it.

7 Apply some clear resin on whipped cream parts, and put beads onto it. Then harden it.

8 Apply a thin layer of clear resin to the top surface except whipped cream parts. Put flocky powder onto it, and push it with tweezers gently. Then harden it.

9 Apply some clear resin on whipped cream parts, and put sprinkles onto it. Then, harden it.

10 Apply some clear resin to the rim of the cup, and close the lid. Then harden it. Attach a sticker to the cup. Connect a ball chain.
