- wet tissue - for cleaning your hands or the table.
- an apron - to protective your clothes.

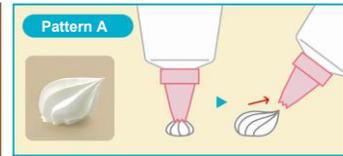

<Magical whip>

Drying time depends on temperature, humidity and size. Do not touch the whip until it dries fully. It may take more than 2-3 days to dry the part which is not exposed to air. The smell of the whip may disappear after it dries. The whip might shrink due to the evaporation after drying. The whip may discolor after it's exposed to the air for a long time. Decoration part colors may occur color transfer onto the whip. Metal parts may get rusty by whip. Wipe a nozzle tip off with wet wipes etc. after use. If the whip on a nozzle tip dries, it may difficult to clean it. We recommend using the magical whip as soon as possible after opening. Store in a cool, dry place away from direct sunlight.

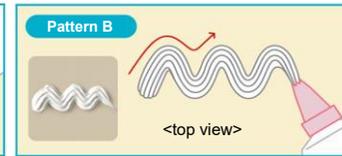

Basic

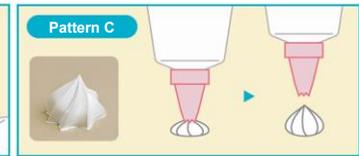

Open a cap and remove an inner lid. Attach a nozzle tip.

Squeeze the magical whip out, and pull the tube up and to the right slowly.

Squeeze the magical whip out as shown in the picture above.

Squeeze the magical whip out, and pull the tube up.

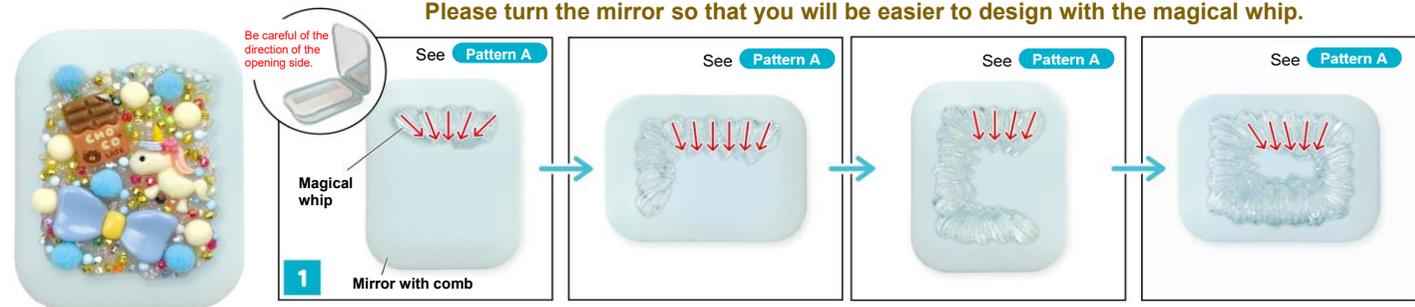

Remove the nozzle tip, and close the cap.

TIP

Please wipe the nozzle tip with wet tissue after use. Otherwise, the whipped cream will dry in the nozzle.

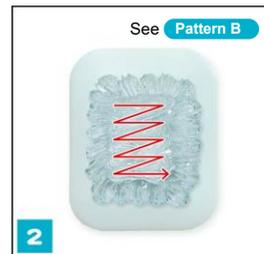

How to make

Please turn the mirror so that you will be easier to design with the magical whip.

Squeeze the magical whip on the mirror. Please see the **Basic** use.

* The surface of the magical whip dries slightly after 10-20 mins.

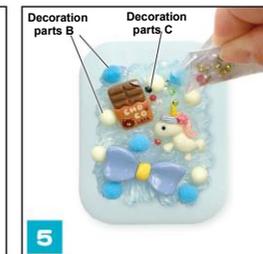

Squeeze the magical whip out, and cover the center with the magical whip as shown in the picture above.

Squeeze the magical whip out to the place where you want to put the decoration parts A.

Put the decoration parts onto the whip, and push parts slightly with tweezers.

Put the decoration parts B onto the whip, and fill the gap with the decoration parts C. Push them slightly with tweezers.

* When the decoration parts C falls, put them back onto the whip.

Put the decoration parts D onto the whip, and push parts slightly with tweezers. Wait until the whip dries.

Done!!

It takes about 2-3 days or more (depend on the temperature and the size) until the whip dries.
